

Documentation for

Area Health Resources Files

June 2021

Jennifer Ailshire, Sarah Mawhorter, Hyewon Kang

A project of the USC/UCLA Center on Biodemography and Population Health sponsored by the National Institute on Aging (R21 AG045625, P30 AG017625).

Requested Acknowledgment

If you use the Contextual Data Resource data in a written analysis, please include the following acknowledgement:

This analysis uses data or information from the Contextual Data Resource (CDR): Area Health Resources Files, June 2021, developed by Jennifer Ailshire, Sarah Mawhorter, Hyewon Kang at the USC/UCLA Center on Biodemography and Population Health and The University Michigan Institute for Social Research. The development of the CDR was funded by the National Institute on Aging (R21 AG045625, P30 AG017625). For more information, please refer to <https://gero.usc.edu/cbph/cdr/>.

Suggested Citation

Ailshire, Jennifer, Sarah Mawhorter, Hyewon Kang. 2021. Contextual Data Resource (CDR): Area Health Resources Files by County, 2000-2019. Version 1.0. Los Angeles, CA: USC/UCLA Center on Biodemography and Population Health.

Data Sources

U.S. Health Resources and Services Administration (HRSA). Area Health Resources Files. <https://data.hrsa.gov/data/download>

Linking CDR Data with HRS Respondent Data

The Contextual Data Resource is designed to be linked with the Health and Retirement Study Cross-Wave Geographic Information (Detail) file, which is available as restricted data. See <https://hrs.isr.umich.edu/data-products/restricted-data> for more information about accessing the HRS restricted data. All geographic identifiers are in string format, and match the geographic identifiers in the HRS Cross-Wave Geographic Information (Detail) file.

- To link county level data, merge using the 5-digit STCTYFIPS10 geographic identifier, which is [the 2-digit state + 3-digit county FIPS code](#). The STCTYFIPS10 geographic identifier has been harmonized to the 2010 county boundaries.

Note on HRS Cross-Wave Geographic Information File

Respondent locations are carried forward to the next wave and they appear for waves in which the interview may not have occurred. xIWTYPE in the Tracker file indicates whether someone was actually interviewed in that wave, in which case, the location would have been confirmed.

If users want to limit analyses to waves in which the R was interviewed, keep waves of observations where xIWTYPE = 1. In summary, a location appearing on a given line does not indicate that an interview took place in that wave; it is simply the location that was on record at the time.

Dataset Overview

The Area Health Resources Files (AHRF) dataset includes information on the number of health care providers by profession and various types of health care facilities derived from medical associations and professional groups. The health professions data provide information on the supply and demographics of health profession such as primary care physicians, total MDs, doctors, dentists, and nurses. The health facilities data include information on types of health facilities and resources such as services providers, personnel, and beds. Data are longitudinal design, and available by county and year.

Data Summary

Dataset Name: The Area Health Resources Files

Data Source: U.S. Health Resources and Services Administration (HRSA)

Data Source URL: <https://data.hrsa.gov/data>

Data Collection Method: Primary data create by Health Resources and Services Administration (HRSA) based on secondary data from American Hospital Association, the American Medical Association, the Center for Medicare & Medicaid Services and other sources.

Years Collected: Varies, ranging from 2000 to 2019

Geographic Level: State and County

Geography and Years Available

While all AHRF data is available on an annualized basis, each sub-topical dataset is available for different years/periods by category, as shown in Table 1 below.

Table 1. Availability for Area Health Resources File by Category

| Category | Years Available |
|--|-----------------------------|
| Primary Care Physicians | 2010-2017 |
| Total MDs | 2000-2008, 2010-2017 |
| Federal MDs | 2005, 2010, 2013-2017 |
| DOs | 2001, 2003-2008, 2010-2017 |
| Dentists | 2007, 2009-2018 |
| Physician Assistants | 2001, 2003, 2007, 2010-2018 |
| Nurses | 2001, 2003, 2009-2018 |
| Other Professions | 2001, 2009-2018 |
| MDs by Specialty and Major Professional Activity | 2000-2008, 2010-2017 |
| Total Facilities | 2005, 2010, 2012-2017 |
| Facilities by Accreditation | 2012-2014, 2016-2017 |
| Hospital Stays | 2005, 2009-2017 |
| Beds | 2005, 2010, 2012-2017 |
| Services | 2012-2014, 2016-2017 |
| Inpatient Service Unit Beds | 2012-2014, 2016-2017 |
| Personnel | 2005, 2010, 2012-2017 |
| Other Service Providers | 2005, 2010-2019 |

Notes on FIPS codes

County level data elements are adjusted for changes that occurred from 2000 onwards.

- Broomfield County, CA (08014) was created from parts of four neighboring counties, CO effective in 2001. No changes made.
- The city of Clifton Forge, VA (51560) was incorporated into Allegheny County, VA (51005) effective in 2001. Data has been combined.
- Bedford (independent) city, Virginia (51515) was added to Bedford County, VA (51019) effective in 2013. Data has been combined.
- Shannon County, South Dakota (46113) Changed names and code to Oglala Lakota County (46102) effective May 1, 2015. Code change applied.
- Data for Alaska has not been adjusted for county changes.

More information on changes in county definitions and boundaries is provided at <https://www.census.gov/programs-surveys/geography/technical-documentation/county-changes.html>

Variable List

| Name | Definition | Type | Geography |
|---------------------------------------|--|-------------|------------------|
| YEAR | Year of data (see Table 1 in documentation) | | |
| STFIPS10 | State FIPS Code (2-digit) | | State |
| CNTYFIPS10 | County FIPS Code (3-digit) | | County |
| STCTYFIPS10 | County FIPS Code (5-digit) | | County |
| STATEUSPS | State Abbreviation | | State |
| STATENAME10 | State Name | | State |
